

ANIKET KONDHALKAR

Aspiring Data Scientist | Machine Learning Engineer

Pune, Maharashtra, India | +91 9322813103 | Aniketkondhalkar4717@gmail.com
[linkedin.com/in/aniket-kondhalkar-174a0a258](https://www.linkedin.com/in/aniket-kondhalkar-174a0a258) | github.com/Aniket-k-17 | Portfolio: aniket-ai.vercel.app

PROFESSIONAL SUMMARY

Aspiring Data Scientist and Machine Learning Engineer with hands-on experience building end-to-end machine learning and data analytics solutions using Python, Scikit-Learn, and Power BI. Skilled in data preprocessing, exploratory data analysis, and predictive analytics, with project experience spanning recommendation systems, computer vision, and business intelligence dashboards. Currently applying data science and ML skills in a live internship role, with a working foundation in AWS cloud services, MLOps, deep learning, and Generative AI concepts including LangChain and RAG.

EXPERIENCE

Machine Learning & Data Science Intern Feb 2026 – Aug 2026

AI Adventures

- Built machine learning and data analytics solutions using Python and Scikit-Learn to support business decision-making.
- Performed data preprocessing, feature engineering, and exploratory data analysis on structured datasets to prepare data for modeling.
- Developed interactive dashboards and visual reports using Power BI and Streamlit to communicate insights to stakeholders.
- Supported predictive analytics initiatives and business reporting workflows.

EDUCATION

Dhananjayrao Gadgil College of Commerce, Satara 2022 – 2025

Bachelor of Computer Applications (BCA)

CGPA: 7.83

PROJECTS

InsightGen – AI-Powered Data Analytics Platform

<https://insightgen-ai-by-aniket.streamlit.app/>

- Engineered an AI-powered platform for automated dataset analysis and intelligent insight generation.
- Implemented end-to-end workflows covering data preprocessing, visualization, exploratory analysis, and predictive analytics.
- Integrated machine learning models into interactive dashboards to support trend analysis.
- Designed a scalable Streamlit-based interface for analytics and reporting.

CineMatch – Movie Recommendation System

<https://huggingface.co/spaces/aniket17k/Cinematch>

- Built a machine learning-based recommendation system using content similarity techniques.
- Processed and analyzed movie datasets to generate personalized recommendations.
- Implemented and optimized recommendation algorithms to improve suggestion relevance.
- Developed an interactive interface for recommendation exploration.

YOLO Object Detection System

- Developed a real-time object detection system using YOLOv8 and OpenCV for computer vision applications.
- Processed live video streams and implemented object localization and classification techniques.
- Optimized inference performance and detection accuracy for real-time prediction tasks.
- Applied deep learning concepts for image processing and intelligent visual recognition.

Retail Marketing Analytics Dashboard

- Developed a business analytics dashboard to analyze retail sales and customer behavior.
- Performed customer segmentation and KPI analysis using Python and Power BI.
- Visualized revenue trends and campaign performance through interactive charts.
- Applied data-driven techniques to support strategic decision-making.

TECHNICAL SKILLS

Programming Languages: Python, SQL

Machine Learning: Classification, Regression, Recommendation Systems, Model Evaluation

Deep Learning: Neural Networks, Computer Vision

Generative AI: LangChain, RAG (Retrieval-Augmented Generation), Generative AI, NLP

Data Science: Data Cleaning, Exploratory Data Analysis (EDA), Feature Engineering, Predictive Analytics

Libraries: Pandas, NumPy, Scikit-Learn, Matplotlib, Seaborn, OpenCV

Visualization & Reporting: Power BI, Streamlit, MS Excel

Cloud: AWS EC2, AWS S3, AWS IAM, AWS CLI

Developer Tools: Git, GitHub, Jupyter Notebook, FastAPI, Docker

Concepts: Machine Learning, Deep Learning, Generative AI, NLP, Computer Vision, MLOps, Business Intelligence, Data Analytics
