Professional Summary

Aspiring **Data Scientist and Machine Learning Engineer** skilled in **Python, SQL, Machine Learning, Deep Learning, and Generative AI**. Experienced in building predictive models, recommendation systems, AI-powered analytics platforms, and interactive dashboards using real-world datasets. Strong understanding of exploratory data analysis, feature engineering, model development, and deployment.

Technical Skills

Programming	Python, SQL
Data Science	Data Cleaning, Exploratory Data Analysis (EDA), Feature Engineering, Predictive Analytics
Machine Learning	Classification, Regression, Recommendation Systems, Model Evaluation
Deep Learning	Neural Networks, Computer Vision
Libraries	Pandas, NumPy, Scikit-Learn, Matplotlib, Seaborn, OpenCV
Visualization	Power BI, Streamlit
Tools	Git, GitHub, Jupyter Notebook, FastAPI, Docker, AWS
Cloud	AWS EC2, AWS S3, AWS IAM, AWS CLI
Concepts	Machine Learning, Deep Learning, Generative AI, MLOps, Business Intelligence

Experience

Machine Learning & Data Science Intern

Feb 2026 – Present

AI Adventures

- Built machine learning and analytics solutions using Python and Scikit-Learn.
- Performed data preprocessing, feature engineering, and exploratory data analysis on structured datasets.
- Developed interactive dashboards and visual reports using Power BI and Streamlit.
- Worked on predictive analytics and business reporting workflows.

Projects

InsightAI – AI-Powered Data Analytics Platform

🔗 [Live Demo](#)

- Developed an AI-powered platform for automated dataset analysis and intelligent insight generation.
- Implemented data preprocessing, visualization, exploratory analysis, and predictive analytics workflows.
- Built interactive dashboards and integrated machine learning models for trend analysis.
- Designed a scalable Streamlit-based interface for analytics and reporting.

Retail Marketing Analytics Dashboard

🔗 [Live Dashboard](#)

- Developed a business analytics dashboard to analyze retail sales and customer behavior.
- Performed customer segmentation and KPI analysis using Python and Power BI.
- Visualized revenue trends, campaign performance, and business insights using interactive charts.
- Applied data-driven techniques to support strategic decision-making.

CineMatch – Movie Recommendation System

 [Project Link](#)

- Built a machine learning-based movie recommendation system using content similarity techniques.
- Processed and analyzed movie datasets to generate personalized recommendations.
- Implemented recommendation algorithms and optimized recommendation accuracy.
- Developed an interactive interface for recommendation exploration.

YOLO Object Detection System

- Developed a real-time object detection system using YOLOv8 and OpenCV for computer vision applications.
- Processed live video streams and implemented object localization and classification techniques.
- Optimized inference performance and detection accuracy for real-time prediction tasks.
- Applied deep learning concepts for image processing and intelligent visual recognition.

Education

Dhananjayrao Gadgil College of Commerce, Satara
Bachelor of Computer Applications (BCA)

2022 – 2025
CGPA: 7.83
