Scan Portfolio

Experience

Machine Learning & Data Science Intern

Feb 2026 – Present

AI Adventures

- ▶ Built **machine learning** and data analytics solutions using **Python** and **Scikit-Learn**.
- ▶ Performed **data preprocessing**, **feature engineering**, and **exploratory data analysis** on structured datasets.
- ▶ Developed interactive dashboards and visual reports using **Power BI** and **Streamlit**.
- ▶ Supported **predictive analytics** and business reporting workflows.

Education

Dhananjayrao Gadgil College of Commerce, Satara

2022 – 2025

Bachelor of Computer Applications (BCA)

CGPA: 7.83

Projects

InsightAI – AI-Powered Data Analytics Platform

[Live Demo](#)

- ▶ Developed an **AI-powered platform** for automated dataset analysis and intelligent insight generation.
- ▶ Implemented **data preprocessing**, visualization, exploratory analysis, and **predictive analytics** workflows.
- ▶ Built interactive dashboards and integrated **machine learning models** for trend analysis.
- ▶ Designed a scalable **Streamlit**-based interface for analytics and reporting.

Retail Marketing Analytics Dashboard

[Live Dashboard](#)

- ▶ Developed a business analytics dashboard to analyze retail sales and customer behavior.
- ▶ Performed **customer segmentation** and **KPI analysis** using **Python** and **Power BI**.
- ▶ Visualized revenue trends, campaign performance, and business insights through interactive charts.
- ▶ Applied data-driven techniques to support strategic decision-making.

CineMatch – Movie Recommendation System

[Project Link](#)

- ▶ Built a **machine learning-based recommendation system** using content similarity techniques.
- ▶ Processed and analyzed movie datasets to generate personalized recommendations.
- ▶ Implemented and optimized **recommendation algorithms** for improved accuracy.
- ▶ Developed an interactive interface for recommendation exploration.

YOLO Object Detection System

- ▶ Developed a **real-time object detection system** using **YOLOv8** and **OpenCV** for computer vision applications.
- ▶ Processed live video streams and implemented object localization and classification techniques.
- ▶ Optimized inference performance and detection accuracy for real-time prediction tasks.
- ▶ Applied **deep learning** concepts for image processing and intelligent visual recognition.

Technical Skills

Programming Languages	Python, SQL
Cloud	AWS EC2, AWS S3, AWS IAM, AWS CLI
Machine Learning	Classification, Regression, Recommendation Systems, Model Evaluation
Deep Learning	Neural Networks, Computer Vision
Data Science	Data Cleaning, Exploratory Data Analysis (EDA), Feature Engineering, Predictive Analytics
Libraries	Pandas, NumPy, Scikit-Learn, Matplotlib, Seaborn, OpenCV
Visualization	Power BI, Streamlit
Developer Tools	Git, GitHub, Jupyter Notebook, FastAPI, Docker
Concepts	Machine Learning, Deep Learning, Generative AI, NLP, Computer Vision, MLOps, Business Intelligence, Data Analytics
